

# ASHREEN KAUR

kashreen13@gmail.com ♦ Portfolio ♦ Medium ♦ LinkedIn ♦ GitHub ♦ Kaggle ♦ Google Cloud

## EDUCATION

Vellore Institute of Technology, Bhopal  
Bachelor of Engineering, Computer Science

2023 – 2027  
CGPA: 8.44/10

## EXPERIENCE

Founder's Office Intern | Friday AI

May 2026 – July 2026

- Built an AI-powered pipeline to scrape and analyze seller, pricing, and transaction/market data from global e-commerce platforms, automating competitor benchmarking to identify growth opportunities for Indian MSMEs
- Synthesized MSME customer and seller feedback with market research (trends, policies, compliance) to inform product iteration and go-to-market decisions

## CASE STUDIES

ClaimSwift – Health Insurance Feature Design

Product Strategy | Credit & Financial Access | [Link to Case Study](#)

- Identified a gap in India's health insurance market via primary research and IRDAI data (9,500+ repudiations, 865 Cr); proposed "ClaimSwift" on Tata 1mg with AI-powered denial prediction, prioritizing features via a problem-to-solution map with adoption, retention, and NPS as success metrics.

Improving the Shopping Experience – Savana

Product Strategy | [Link to Case Study](#)

- Diagnosed a systemic trust gap via VoC analysis and 5 root-cause analysis (wrong/damaged deliveries, broken return quality check); proposed a fast-track dispute flow for high-severity claims, targeting resolution time (<48 hrs), claim rejection rate, and repeat purchase rate as success metrics.

Women's Participation Growth – A23 Rummy

Growth Strategy | [Link to Case Study](#)

- Diagnosed low women's participation via hypothesis-driven research; prioritized 3 features (P2P lending, private tables, women-centric rewards) using an impact-vs-ease framework, with per-female-user P2P transactions, ARPU, and retention rate as success metrics.

The Person Behind the Delivery

Product Strategy | Gig Economy | [Link to Article](#)

- Identified rider-experience gaps via research and competitive benchmarking (DoorDash, Uber Eats); prioritized 14 features using RICE and Impact-Effort frameworks, translating them into UI mockups and a launch plan

## PROJECTS

Personal Portfolio Website

React, Netlify, Vibe Coding, Agentic Development | [Live Site](#)

- Built and deployed a responsive portfolio showcasing 5+ projects using AI-assisted vibe coding; 99.9% uptime via Netlify CI/CD.

## SKILLS

|           |                                                                                                                                                                                          |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product   | User Research, Funnel Analysis, Feature Prioritization, Growth Strategy, Metrics & KPI Definition, Product Roadmapping, A/B Testing, User Journey Mapping, Stakeholder Communication     |
| Tech      | Data Science, Data Analytics & Visualization, Generative AI, Software Development, AI Prototyping, Google Cloud Platform, Git/GitHub, Kaggle, AI Tools (GPT, Gemini, Claude, Perplexity) |
| Languages | Python, SQL, C/C++, Java                                                                                                                                                                 |
| Libraries | Pandas, NumPy, Sklearn, Seaborn, Plotly, Streamlit                                                                                                                                       |

## ACHIEVEMENTS & CERTIFICATIONS

- Kaggle Intermediate Machine Learning: [Completion Badge](#)
- Google Cloud Introduction to Generative AI: [Completion Badge](#)
- Google Cloud Prompt Design in Vertex AI Skill Badge: [Completion Badge](#)
- Google Cloud Real World AI Applications with Gemini and Imagen: [Completion Badge](#)
